

Oğuz Güneren

Artificial Intelligence Engineer | Data Scientist

gnrnoguz@gmail.com | +90 551 126 23 26 | oguzguneren.com

github.com/oguzgnrn | linkedin.com/in/oguzgnrn

AI Engineer and Data Scientist with over four years of experience across production data pipelines, machine learning, computer vision and end-to-end AI products. Completing a B.Sc. in Artificial Intelligence and Data Engineering at Istanbul Technical University.

EXPERIENCE

AI Engineer & Founding Partner | SPOT

May 2026 - Present · Amsterdam / Remote

- Built and shipped a basketball video analytics product end to end: five task-specific vision models, custom tracking and player identification, shot maps and automatic highlights.
- Designed distributed GPU inference and the production web application; optimized compute requirements and scoring consistency, validating on real matches across multiple countries.

Data Scientist / AI Engineer | Turkish Technology (Turkish Airlines)

Nov 2025 - Present · Istanbul / Hybrid

- Build production pipelines over large-scale event data with automated backfills, idempotent processing, schema evolution and data-quality validation.
- Develop leakage-safe ML and SHAP/XAI workflows; use hypothesis testing, sensitivity analysis and model-based diagnostics to inform product and engineering decisions.

AI Research Intern | TÜBİTAK BİLGEM, B3LAB

Aug 2025 - Sep 2025 · Gebze

- Built a fiscal time-series pipeline using U.S. federal expenditure data, stationarity testing, Granger causality, VAR and impulse-response analysis.

AI Engineer Intern - Computer Vision | Cezeri AI & Robotics (Baykar)

Jun 2025 - Aug 2025 · Istanbul

- Built real-time segmentation, tracking and geometric estimation on NVIDIA Jetson Orin; benchmarked lightweight SAM models with ONNX and TensorRT for edge deployment.

Earlier experience

Seller Integral · Data Scientist · Sep 2023 - Feb 2025

Maestrozon · Data Scientist · Jul 2024 - Sep 2024

Schneider Electric · Data Scientist Intern · May 2024 - Jul 2024

Overtch · Data Science Intern → Junior Data Scientist → Computer Vision Engineer
Feb 2022 - May 2023

Python data collection and automation, e-commerce ML, customer analytics and TÜBİTAK-supported CNN/YOLO development on a custom 100-class dataset.

SELECTED PROJECTS

EComGen | Founder & Sole Developer · 2026

- Shipped a generative AI SaaS for product imagery, video and multilingual SEO content using Vertex AI, Gemini and Veo; integrated Shopify, Amazon SP-API, Stripe and 5,000+ SEO landing pages.

Deep Learning for Dementia | 2nd Place, TechCrew Hackathon · Aug 2023

- Built a four-class MRI classification prototype with 91% accuracy on approximately 6,400 images and a Gradio interface within a 24-hour competition.

EDUCATION

Istanbul Technical University | B.Sc. Artificial Intelligence and Data Engineering

Expected 2026 · Istanbul, Türkiye

TECHNICAL SKILLS

Languages & apps: Python, SQL, TypeScript/JavaScript, React/Next.js, FastAPI/Express

ML & vision: PyTorch, TensorFlow, scikit-learn, XGBoost, SHAP, YOLO, SAM 2, OpenCV

Data & cloud: BigQuery, PostgreSQL, Pandas, Polars, Docker, Modal, Supabase, Railway

Generative AI: Gemini, Vertex AI, Veo, multimodal AI, LLM integration, agentic workflows
